6	J.A. CRAWFORD	64	46	36	146	65	62	33	160	306

This was the first meeting since the introduction of the reduced sized bullseye. With generally strong and somewhat variable winds on the Saturday it was not surprising that scoring was somewhat depressed. The batch of ammunition, 9 RA 73, was the same as in 1973. In addition to those named above five other members shot one complete day.
